Bulletin of the Institute of Mathematics
Academia Sinica New Series
Volume 11, Number 1, March 2016

Contents
Preface ............................................................... 1
Non-linear maximum entropy principle for a polyatomic gas subject to the
dynamic pressure
Tommaso Ruggeri ................................................... 1
A double large deviation principle for Monge-Ampere gravitation
Yann Brenier .......................................................... 23
Semi-classical limit of an infinite dimensional system of nonlinear Schrödinger
equations
Claude Bardos and Nicolas Besse .................................. 43
Compactness estimates for Hamilton-Jacobi equations depending on space
Fabio Ancona, Piermarco Cannarsa and Khai T. Nguyen ............. 63
Conservative front tracking: the algorithm, the rationale and the API
R. Keimel, H. Len and J. Glown ................................ 115
BV solutions for hyperbolic balance laws with periodic initial data
Constantine M. Dafermos ........................................... 131
A dynamical systems approach to mathematical modeling of tornadoes
Evelyn Lunasin, Reza Malek-Madani and Marshall Slemrod ........ 145
Quantitative estimate of the stationary Navier-Stokes equations at infinity and
uniqueness of the solution
Ching-Lung Lin and Jenn-Nan Wang ................................ 163
A model reduction method for elliptic PDEs with random input using the
heterogeneous stochastic PIM framework
Thomas V. Hou, Pengfei Liu and Zhiwen Zhang ..................... 179
Numerical analysis of a canonical shock wave interaction problem in general
relativity
Blake Temple and Zenz Vogler .................................. 217
Convergence rate of the Glimm scheme
Stefano Modena and Stefano Bianchini ............................ 235

BULLETIN of the
Institute of Mathematics
Academia Sinica New Series

Edited by
Stefano Bianchini (Scuola Internazionale Superiore di Studi Avanzati)
Luis A. Caffarelli (University of Texas at Austin)
Ching-Li Chai (University of Pennsylvania)
Jih-Hsin Cheng (Academia Sinica)
Shun-Jen Cheng (Academia Sinica)
Mariano Giaquinta (Scuola Normale Superiore)
Peter Greiner (University of Toronto)
Ching-Hung Lam (Academia Sinica)
Chang-Shou Lin (National Taiwan University)
Tai-Ping Liu (Academia Sinica and Stanford University)
Shigeiti Mori (Kyoto University)
Yum-Tong Siu (Harvard University)
Weiqiang Wang (University of Virginia)
Shih-Hsien Yu (National University of Singapore)
Xuding Zhu (National Sun Yat-Sen University)

Institute of Mathematics, Academia Sinica
