

Index

Volume 10, 2015

	Page
Truncated convolution of character sheaves, <i>G. Lusztig</i>	1
An extended propositional logic, <i>Mariano Giaquinta, Giuseppe Modica and Jiří Souček</i>	73
Strong laws for ratios of order statistics from exponentials, <i>André Adler</i>	101
Generalized skew derivations on Lie ideals, <i>Vincenzo De Filippis and Çagri Demir</i>	113
A characterization of Hilbert spaces using sublinear operators, <i>Khalil Saadi</i>	131
Global existence theory for a general class of hyperbolic balance laws, <i>Yanni Zeng</i>	143
On the evolution of the empirical measure for the Hard-Sphere dy- namics, <i>M. Pulvirenti and S. Simonella</i>	171
The steady Boltzmann and Navier-Stokes equations, <i>Kazuo Aoki, François Golse and Shingo Kosuge</i>	205
The one way linearized water wave equations, <i>G. I. Jennings, S. Karni and J. Rauch</i>	259
Critical exponents for the Cauchy problem to the system of wave equa- tions with time or space dependent damping, <i>Kenji Nishihara and Yuta Wakasugi</i>	283
The Vlasov-Poisson-Landau system with a uniform ionic background and algebraic decay initial perturbation, <i>Yuanjie Lei, Ling Wan and Huijiang Zhao</i>	311
Finite energy global solutions to a two-fluid model arising in superflu- idity, <i>Paolo Antonelli and Pierangelo Marcati</i>	349
Ekmann boundary layer expansions of Navier-Stokes equations with rotation, <i>Shengbo Gong, Yan Guo and Ya-Guang Wang</i>	375
Self-similar solutions of 2-D compressible Euler equations and mixed- type problems, <i>Jiequan Li</i>	393

Second-order Knudsen-layer analysis for the generalized slip-flow theory I, <i>Masanari Hattori and Shigeru Takata</i>	423
Structurally stable singularities for a nonlinear wave equation, <i>Alberto Bressan, Tao Huang and Fang Yu</i>	449
Asymptotic profile of solutions to a hyperbolic Cahn-Hilliard equation, <i>Hiroshi Takeda, Yasunori Maekawa and Shuichi Kawashima</i>	479
Internal structure of dynamic phase-transition fronts in a fluid with two compressible or incompressible phases, <i>Heinrich Freistühler and Matthias Kotschote</i>	541
Scalar viscous conservation laws in \mathbb{R}^2 , <i>Shijin Deng and Weike Wang</i> ..	553
Global solutions to 3D isentropic compressible Navier-Stokes equations with free boundary, <i>Huihui Kong, Hai-Liang Li and Chuangchuang Liang</i>	575
Existence and stability of time-periodic solutions to the drift-diffusion model for semiconductors, <i>Toru Kan and Masahiro Suzuki</i>	615
The mathematical theory of self-similar boundary layers for nonlinear hyperbolic systems with viscosity and capillarity, <i>Anupam Pal Choudhury, K. T. Joseph and Philippe G. LeFloch</i>	639
Expansion of a compressible gas in vacuum, <i>Denis Serre</i>	695
