

由於 $\sum_{K=1}^{\infty} a_K^2 < \infty$, 有正數 M 使得 $|a_K| \leq M$, 故

$$\left| \frac{1}{n} \sum_{K=1}^{[\sqrt{n}]} a_K \right| \leq \frac{1}{n} \sum_{K=1}^{[\sqrt{n}]} |a_K| \leq \frac{M[\sqrt{n}]}{n} \rightarrow 0, \text{ 當 } n \rightarrow \infty$$

此處 $[x]$ 表小於 x 之最大整數。再者由科西準則 (Cauchy criterion)

$$\sum_{K=[\sqrt{n}]+1}^{n^2} a_K^2 \rightarrow 0 \quad \text{當 } n \rightarrow \infty$$

故有,

$$\begin{aligned} \left| \frac{1}{n} \sum_{K=1}^{n^2} a_K \right| &= \left| \frac{1}{n} \sum_{K=1}^{[\sqrt{n}]} a_K + \frac{1}{n} \sum_{K=[\sqrt{n}]+1}^{n^2} a_K \right| \\ &\leq \frac{1}{n} \sum_{K=1}^{[\sqrt{n}]} |a_K| + \frac{1}{n} \sum_{K=[\sqrt{n}]+1}^{n^2} |a_K| \\ &\leq \frac{M[\sqrt{n}]}{n} + \left(\sqrt{\sum_{K=[\sqrt{n}]+1}^{n^2} |a_K^2|} \right) \left(\frac{1}{n} \sqrt{\sum_{K=[\sqrt{n}]+1}^{n^2} 1} \right) \\ &\quad \text{(科兩不等式)} \\ &\leq \frac{M[\sqrt{n}]}{n} + \sqrt{\sum_{K=[\sqrt{n}]+1}^{n^2} |a_K^2|} \\ &\rightarrow 0 \quad \text{當 } n \rightarrow \infty \end{aligned}$$

證畢。
